

Bartec TPMS Tools

TECH300PRO

Part Number:
WRT300PRO

The TPMS Pro Series tools are designed for the automotive service professional. The Tech300Pro is the entry-level TPMS tool that allows you to grow TPMS service at the pace of your business. The Tech300Pro is an activation-only tool that has loads of features that your typical activation-only tool doesn't have. When it makes sense to upgrade your service capability, the Tech300Pro upgrades to a TPMS OBD Tool!

**Optional
OBDII Kit!**

Part Number:
WRT300PROUPG

Features

- Entry-level activation tool that can be fully upgraded to an OBDII scan tool, providing greater TPMS functionality
- Wireless Bluetooth data transfer
- Programs sensors and works with multi-protocol sensors
- Made in the UK and assembled in the USA
- Only TPMS tool that is "in-field" upgradeable to OBDII functionality

Benefits

- Get started with a TPMS activation tool with a large, easy-to-read screen, and upgrade when it makes sense for your business
- You choose the sensor solution that fits your business
- Quality tool and support
- An upgradeable tool means you decide if you need greater tool function
